Beth:

I am taking it that we could not go to US Ecology because of the VOCs are greater than 500 ppm so we are going to get it approved at Veolia with the possibility of taking it to EQ. I did not check the landban on this waste anyway so it would have to be treated to be landfilled.

Also, did you mean that NT7 was scheduled for Lonestar or Ashgrove?

Thanks

Gary,

Attached is an amendment to our original profile for Veolia. I had them add the sludge 2,5 composites to this profile. Unfortunately we had toluene and xylene hits that put us over 500ppm for totals. I do have EQ looking at this stream to see if they can treat it in Michigan. I know it's a haul but much better than incineration. FT1001 is approved Leroy will schedule that. FT1004 LeRoy is meeting with Demita on Monday to go over this mitigation plan. I didn't think it looked to be too detailed just an explanation of what they will be doing and what safeguards they have in place to make sure this is done safely. NT7 is scheduled into Lonestar on Tuesday 2/17 the pricing was confirmed at \$1.00 per gallon. BTU's were 10,000 water was at 40%. Total T&D will be \$7,000 still cheaper than toting the material.

I believe that is it for now. I am available on my cell all day tomorrow 419-721-1988.

Thanks,

Beth Crawford
